

KRS

Energy-saving at low heads as optimum point allocated at lower head than other KRS's.

The low head version is equipped with a specially developed motor to minimize unnecessary power consumption for maximal cost economy.

Submersible Drainage Pumps

KTV/KTVE KTZ/KRS

■ Major Standard Specifications

Item		Discharge bore (mm)		
		100	150	200
Pumping fluid	Type of fluid	Rain water, Ground water, Sand carrying water		
	Liquid temperature	0 ~ 40℃		
Pump	Components	Impeller	Semi-open type, Closed type (KRS-63-85.5)	
		Shaft seal	Double mechanical seal	
		Bearing	Shielded ball bearing	
	Materials	Impeller	Ductile iron casting	
		Casing	Gray iron casting	
		Suction cover	Gray iron casting	
		Shaft seal (mechanical seal)	Silicon carbide	
Motor	Type, Poles	Dry-type submersible induction motor, 4 poles		
	Insulation	Class E, B		
	Phase / Voltage	Three-phase / 220V, 380V, 400V, 415V, 440V, 460V		
	Motor protector(Built-in)	Circle thermal protector		
	Lubricant	Turbine oil (ISO VG32)		
	Materials	Frame	Gray iron casting	
		Shaft	Stainless steel #420	
Cable		Chloroprene rubber		
Discharge connection		Hose coupling		

■ Standard Accessories

- Cabtyre cable 1 pc
- Hose coupling 1 pc

■ Optional Specifications

- Extended cable
- Special paint

Compact, sturdy, and powerful submersible pumps Ideal for the most demanding construction jobs

Pumps must have solid structure, operate safe and easy, and offer high mobility. Now, you'll have to cap each of these attributes with the word "extra" when it comes to drainage pumps for construction work. Tsurumi has done it — not in word but in deed. Deliberately arranging on-the-job requirements in product design, Tsurumi has built a new series of extra powerful submersible pumps which ideally matches any demanding draining jobs. Each and every one of these products which represent Tsurumi's years of pump-making expertise has been hallmarked through daily work at many construction sites in the world.

KTV

Submersible Semi-vortex Drainage Pumps

for General Construction Work
2-pole Motor Series

Compact

The height has been reduced by a maximum of 181 mm (133 mm for KTV 2-15 and KTV 2-37) from Tsurumi's conventional equivalents by eliminating unnecessary room in the motor and the pump. These pumps are the smallest in this class in the industry.

Lightweight

Pump materials have been changed in part to die-cast aluminum and specially treated synthetic rubber. This has reduced the weight of all models in this series by more than 10 kg compared with Tsurumi's conventional pumps of the same type. An ergonomically devised handle facilitates the relocation of the pump at a construction site.

Built-in Oil Lifter (Pat. Pending)

This Oil Lifter was developed to improve quality and reliability of our submersible pump by enhancing sealing performance of the mechanical seal.

- * The Oil Lifter is a lubrication device for the mechanical seal that is the heart of the submersible pump.
- * The Oil Lifter stabilizes and enhances mechanical seal lubrication and cooling effect.
- * Offers stable sealing performances even if the oil level drops. Facilitates periodic inspection.

Lower part is disassembled with a box wrench for effortless maintenance without impeller removal.

KTZ

Submersible Drainage Pumps

for General Construction Work
2-pole Motor Series

Rugged

The cast iron pump body presents a different way of top durability that can not be obtained by the aluminum body pumps. A choice is possible between high head version and high volume version in every motor size.

Increased water-pressure resistance

A newly developed mechanical seal endures water pressure of up to 0.98MPa {10kgf/cm²}. This has made our KTZ submersible pumps usable at greater depth, such as in deep wells, to say nothing of use at general construction sites.

KRS

Submersible Drainage Pumps

for General Construction Work
4-pole Motor Series

Rugged

KRS-series, another cast iron pumps with 4-pole motor, represent Tsurumi's multipurpose pumps for their simple construction, superb durability, and high efficiency. Tsurumi's years of expertise and innovative techniques are fully utilized in every component of these pumps which have own user's unparalleled credit and admiration.

Excellent durability secured by Tsurumi's long pump-making experience renders these pumps multipurpose ranging from construction work to installation in facilities.

Major Standard Specifications

Discharge bore (mm)		50	80	
Item				
Pumping fluid	Type of fluid	Rain water, Ground water, Sand carrying water		
	Liquid temperature	0 ~ 40℃		
Pump	Components	Impeller	Semi-vortex	
		Shaft seal	Double mechanical seal	
		Bearing	Shielded ball bearing	
	Materials	Impeller	Synthetic rubber(0.75kW) Ductile iron casting	
		Casing	Synthetic rubber	
		Shaft seal (mechanical seal)	Silicon carbide	
Motor	Type, Poles	Dry-type submersible induction motor, 2 poles		
	Insulation	Class E		
	Phase / Voltage	Three-phase / 220V, 380V, 400V, 415V, 440V, 460V		
	Motor protector(Built-in)	Circle thermal protector		
	Lubricant	Turbine oil (ISO VG32)		
	Materials	Frame	Aluminum alloy casting	
		Shaft	Stainless steel #420 / #403	
Cable		PVC Chloroprene rubber		
Discharge connection		Hose coupling		

Standard Accessories

- Cabtyre cable 1 pc
- Hose coupling 1 pc
- Hose band (0.75kW only)..... 1 pc

Optional Specifications

- Extended cable
- Special paint

KTV3-55	80	300	229	545	422	300	545	90

Probe type automatic pump (KTVE model)

Unit is turned on/off by probe-type water level sensor to prevent draught water flow when the water level drops.

Enhances durability of the pump itself by reducing radical part wear while saving energy.
