

GL-50-5

Performance Curve

Features

- Since the pump is of high-quality, finished at the same accuracy as hydraulic pump, it can be applied to a wide range of activities from low-viscosity oil such as kerosene, light oil, etc. to medium/ high-viscosity oil.
- Since the pump is a bypass valve built-in type, and is equipped with relief function, it can be used safely.

**GL-32-5 has a flexible joint, and other types use flexible coupling.

*When using high/midium-viscosity oil, use the pump together with the motor of one rank higher grade.

(belting is not applicable).
